Derek Dinh

Denver, CO | dinhderek@gmail.com | linkedin.com/in/dinhderek | derekdinh.com | github.com/derekdinh1

SUMMARY

Senior IT Engineer with 9+ years of experience administering SaaS, identity, and endpoint environments, with fleets ranging from 300 to 1,200+ devices, across macOS and Windows as well as core apps like Okta, Microsoft 365, Google Workspace, Jamf Pro, Intune, Slack, Zoom, Atlassian, etc. Focuses on automating manual processes to free up time and resources, while incorporating AI where it enhances user experience. Serves as a senior escalation point, writes playbooks and documentation, mentors junior staff, and leads cross-functional projects, including acquisition technology integrations.

SKILLS

Identity & Access Management: Okta, Azure AD / Entra ID, SSO / SAML, user lifecycle provisioning (onboarding/offboarding), access controls
SaaS & Collaboration: Microsoft 365, Google Workspace, Slack, Zoom (administration, Rooms), Atlassian (Jira, Confluence), Miro, DocuSign, 1Password, GitHub, SaaS administration, Microsoft 365 licensing, Gmail routing, executive and event support
Endpoint & Device Management: Jamf Pro (scripting, patching), Intune, Kandji, Workspace One, VPN administration, macOS and Windows endpoint management, device enrollment and imaging, IT asset lifecycle and inventory tracking
Automation, AI & Scripting: Okta Workflows, Workato, Zapier, n8n, Console AI, Claude Enterprise, OpenAI (ChatGPT), Glean, Python, Bash, JavaScript, Terraform, API integrations, AI agent and bot building, AI agent access governance, AI playbooks, prompt engineering
Security & Compliance: SOC 2 compliance, risk assessments, security best practices, end-user security education
IT Service Management: ServiceNow, Zendesk, FreshService, Jira Service Management, incident management, root cause analysis, SLA management, runbooks, SOPs, knowledge base and technical documentation, A3 / Lean process improvement

EXPERIENCE

Senior IT Support Engineer Feb 2025 – July 2026
Spring Health *Denver, CO*

- Designed and built agentic AI agents across department platforms and company channels using Console, ChatGPT, and Claude, automating IT workflows and achieving over 70% automated ticket resolution.
- Wrote runbooks and playbooks for an AI assist bot that automates Tier 1 and Tier 2 support tickets, and revamped IT SOPs to create frameworks for further workflow automation.
- Served as senior escalation point for complex technical issues, performing root cause analysis and partnering with stakeholders to ensure timely resolution.
- Revamped documentation process to enable self-service, both internally in the team and externally for our end-users as well as AI agents.
- Managed technology integration and migration activities during acquisition efforts, coordinating across multiple teams to minimize disruption.

Senior IT Support Specialist June 2023 – Feb 2025
Valtech (formerly Kin+Carta) *Denver, CO*

- Managed 500+ Apple endpoints with Jamf Pro, supporting device management, maintenance, and security.
- Wrote Jamf scripts for silent TeamViewer installation and used Jamf patching to keep endpoint software current.
- Worked with FileVault and Escrow Buddy to rotate encryption keys and support endpoint security.
- Implemented security and operational best practices through risk assessments, system maintenance, and end-user security education.
- Managed one direct report and mentored junior IT support staff.

IT Support Engineer April 2022 – May 2023
Handshake *Denver, CO*

- Managed macOS endpoints with Jamf Pro, achieving 95% uptime and streamlining device enrollment by 40%.
- Designed and implemented automated Okta Workflows and system enhancements, improving operational efficiency and user experience by 50%.
- Diagnosed and resolved hardware, software, and network issues, reducing ticket resolution times by 60%.
- Maintained technical documentation and knowledge base content, increasing documentation accuracy by 70%.

IT Support Admin April 2021 – April 2022
Red Canary *Denver, CO*

- Led a process improvement team for new hire onboarding and training using A3/Lean methodology, improving the end-user onboarding experience by 90%.
- Built Zendesk and Slack workflows for end-user help requests, improving response times by 30%.
- Drove documentation maintenance for new systems, increasing knowledge management by 40%.

EARLIER EXPERIENCE

- IT Desktop Support Specialist | FORM MarketX (formerly GoSpotCheck) | Dec 2019 – Mar 2021
- Software Support Specialist | FORM MarketX (formerly GoSpotCheck) | Oct 2018 – Dec 2019
- FE Development Testing Intern | Spectrum | May 2018 – Aug 2018
- Tech Zone Supervisor (Contract) | Prologis | Mar 2018 – May 2018
- IT / Helpdesk Intern | 2U | Mar 2017 – Jul 2017

PROJECTS

Portfolio - derekdinh.com

- Personal portfolio site (undergoing revamp), built with JS, Claude Code, Cursor, and Kie.ai.

Course Builder

- A skill AI agents can use to deep research a topic and create a course implementing the best learning techniques where you can choose the length and depth.

Uvoice - derekdinh1.github.io/uvoice

- Learns how you naturally write from a few short prompts, then generates a Voiceprint and system prompt so ChatGPT, Claude, or any AI writes like you.

EDUCATION

Colorado Technical University 2020

Bachelor of Science in Information Technology, minors in Web Development and Project Management.
